I.	Basis	of the	report
----	-------	--------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	Description, Pages						
	1-30	)	as originally filed					
	<b>.</b>							
		ms, Numbers						
	1-17	,	as originally filed					
2.	With lang	With regard to the <b>language</b> , all the elements marked above were available or furnished to this Authority in the unguage in which the international application was filed, unless otherwise indicated under this item.						
	The	se elements were ava	ailable or furnished to this Authority in the following language: , which is:					
		the language of a tra	nslation furnished for the purposes of the international search (under Rule 23.1(b)).					
		the language of publi	cation of the international application (under Rule 48.3(b)).					
		the language of a tra Rule 55.2 and/or 55.3	nslation furnished for the purposes of international preliminary examination (under 3).					
3.	With inte	With regard to any <b>nucleotide and/or amino acid sequence</b> disclosed in the international application, the nternational preliminary examination was carried out on the basis of the sequence listing:						
		contained in the international application in written form.						
		filed together with the international application in computer readable form.						
		furnished subsequently to this Authority in written form.						
		furnished subsequen	tly to this Authority in computer readable form.					
		The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.						
		The statement that the listing has been furni	ne information recorded in computer readable form is identical to the written sequence shed.					
4.	The amendments have resulted in the cancellation of:							
		the description,	pages:					
		the claims,	Nos.:					
		the drawings,	sheets:					
5.		This report has been been considered to g	established as if (some of) the amendments had not been made, since they have go beyond the disclosure as filed (Rule 70.2(c)).					
		(Any replacement sh report.)	neet containing such amendments must be referred to under item 1 and annexed to this					
6.	Add	litional observations, i	f necessary:

#### Ad Section III:

Claim 13 refers to a method falling under the provisions of Rule 67.1(iv). According to Art.34(4)(a)(i), this claim is therefore not assessed in regard to industrial applicability.

For the assessment of the present claim 13 on the question whether they are industrially applicable, no unified criteria exist in the PCT Contracting States. The patentability can also be dependent upon the formulation of the claims. The EPO, for example, does not recognize as industrially applicable the subject-matter of claims to the use of a compound in medical treatment, but may allow, however, claims to a known compound for first use in medical treatment and the use of such a compound for the manufacture of a medicament for a new medical treatment.

#### Ad Section V:

The present application relates to hair and/or scalp treatment compositions containing tulsi oil together with a metal pyrithione, capable of synergism.

The application relates also to the use of tulsi oil or components thereof and a synthetic antimicrobial agent, in the manufacture of a composition for the treatment/prevention of dandruff. Components of tulsi oil are eugenol, terpinen-4-ol, linalool or alpha-terpineol. The preferred antimicrobials are zinc pyrithione, climbazole, octopirox (piroctone omadine) and ketoconazole.

## INTERNATIONAL PRELIMINARY

International application No. PCT/EP03/06991

**EXAMINATION REPORT - SEPARATE SHEET** 

OHIO, US; CHENG, JINXUE: 'Antiitching and antidandruff shampoo containing extracts of snake tissues and medicinal plants' retrieved from STN Database accession no. 131:9442 XP002219806 & CN 1 116 234 A (PEOP. REP. CHINA) 7 February 1996 (1996-02-07)

The use of Tulsi oil in the control of dandruff is known from D1, as is the use of certain of its component compounds against dandruff (see D3 and D4). The use of known antimicrobials such as zinc pyrithione or piroctone omadine in dandruff control is also known.

The use of combinations of Tulsi oil or components thereof with further antimicrobials in dandruff control is novel (Art.33(2) PCT). The applicant has shown synergistic effects for many combinations, thus inventive step can also be acknowledged (Art.33(3) PCT).

Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the documents D1 to D5 is not mentioned in the description, nor are these documents identified therein.
